Introduction
This document contains the steps to disable the function that the keyboard opens automatically.
(For Win CE 7.0 operating systems).
If you follow the instruction the keyboard don’t open automatically anymore.
**HINT**: This function is automatically deactivated as HMI runtime version 5.0.1183.16

Settings
Open about the Start icon the „Run…” function

Enter „regedit“ and press „OK“
Choose „CUser“ in the left upper corner.

Select at first „ControlPanel“ and then „Sip“.
It's necessary to change the value from "TurnOffAutoDeploy"

With a double click you can open the following window. Enter in "Data of the value" the 1 and confirm it with "OK".

Check if the value is changed to 1. Now the keyboard don't open automatically anymore.
Safe the settings with the function „Registry Safer“ in the „Control Panel“.
